

UV SYSTEMS

PURPOSE: Inactivate chlorine-resistant parasites.

RESULT: Water that is free of bacteria and viruses that are invisible to the naked eye.

UVMAX C4

The technology and care that goes into the development of our products is of the highest standards. The UVMAX C4 system has been designed and tested against the most rigorous validation and testing methods in the industry.

FEATURES OF THE UVMAX C4:

- Equipped to inactivate chlorine-resistant parasites such as Cryptosporidium and Giardia, harmful bacteria like E.Coli and viruses not visible to the naked eye.
- The special lamp plug ensures that no one can power the UV lamp if it's not in the UV chamber.
- Lamps and sleeves are assembled together for ease of handling. They can be replaced separately, in minutes and without tools.
- The reference card outlines the most important system functions and maintenance for quick, on-the-spot questions.
- Indicator lights show the status of system components. Warning lights appear when system maintenance is required.
- Our high output validated UV lamp is engineered to treat variable water conditions.
